

Advancing Institutional Theory and Analysis: Current Initiatives Extending the Ostrom Research Agenda

The research of Vincent and Elinor Ostrom has inspired scholars from around the world and from various disciplines to investigate the institutions that communities use to govern behavior and connected social-ecological systems. This special presentation will explore how the Ostroms' work on institutional theory and analysis is being extended in novel ways through various initiatives, programs, and research centers.

The presentation will be moderated by Dr. Edella Schlager, who will open the panel with an overview of key foci of the Ostroms' research agenda. The panel will then feature presentations by scholars involved with the Institutions for Collective Action Program; the Center for Behavior, Institutions, and the Environment; the Library on Governance in Social-Ecological Systems; the Institutional Grammar Research Initiative, and the Ostrom Workshop. Presenters will discuss the missions of their respective groups, what they view as key innovations in institutional theory and analysis, and how their research teams are addressing these. If you are interested in learning more about these efforts and/or how you may get involved, please join us.

When

Tuesday, January 19, 2021
12:00 – 1:30 p.m. (Eastern)

Where
